Policy Overview

The Centers for Medicare and Medicaid Services (CMS) classifies certain procedure codes as always bundled when billed on the same claim with another procedure code or codes to which the bundled code shares an incidental relationship.

The purpose of this policy is to define payment criteria for covered services designated by CMS as always bundled to another procedure or service to be used in making payment decisions and administering benefits.

Application

1. Physician and Non-physician Practitioner Services
2. Outpatient Institutional Claims

Policy Description

CMS defines certain procedures or services as “always bundled” to another procedure or service when billed with another procedure code or codes to which the bundled code shares an incidental relationship. The CMS National Physician Fee Schedule Relative Value File (RVU) designates the always bundled procedures with a status indicator of “B.” If the procedure code is listed with a status indicator of “B”, then payment for the procedure code (if covered by the Health Plan) is always subsumed by the payment for other procedures or services billed to which they are incidental and which are not designated as a status “B” procedure or service.

Reimbursement

1. The Health Plan’s code editing software evaluates the current claim and historical claim lines that are billed with procedure codes designated as status “B” and compare to other procedures billed on the claim.
2. This rule reviews claims for same member, same provider ID and same date of service.
3. If another procedure(s) is found that is *not* indicated as a status “B” code, the service line with the status “B” code is denied.
4. Payment for the status “B” code is considered subsumed by the payment for the other services without the status “B” designation.
5. Procedure codes designated as status “B” will always pay when billed alone.
6. Procedure codes designated as status “B” will always pay when billed with another procedure code that also bears the status “B” designation.
